RS350 Parameters

Model	RS350
General description	Label Finisher based on rotary blades technology, High cutting precision with full servo motor, Fully automatic tension and feeding control
Max. web diameter	500mm
Web roll width	100-350mm
Max cutting length	800mm
Tension web systems	Yes
Max. Cutting Speed	12m/min
Max Head	8 Heads independent
Auto distance cutting head	Yes Automatic
Correction web guide	Ultrasonic
Precision cut	0.1mm
Marker readers	Yes
QR code reader	Yes for automatic job changes
Lamination	Yes Standard
Waste removal	Yes Standard
Count label quantity	Yes, in line sensor
Output slitter Units	9 units
Output Web roll	2 standard: up rewinder + down rewinder
Output sheet to sheet	1 paper stack
Safety	2*Stopper (Light Curtain: Optional)
Panel Control	2 LCD Panels
Interface	Lan connector for fast data exchange
Software	SCC Sinajet Cutting Control
Exchange data	Main data on folder PC (PC not included, provided by dealer)
Air Compressor	1 external connector needs 1kw (Optional)
Power Supply	220V /50 Hz 4.35KW
Net Dimension	3050*1360*1830mm
Net Weight	1300KGS
Working Environment	Temperature 0-40°C, Humidity 20%-80% no condensation
Others	Autofeed thickness can change depending on quality of material: rigidity, roughness, laminated or not. Quality acceptance depends on different cutting files.
